### Uwagi ogólne

Ten raport nie powinien być powielany inaczej jak w pełnej formie bez pisemnej zgody laboratorium.

Laboratorium oświadcza, że wyniki odnoszą się wyłącznie do wymienionych próbek. Jeśli w polu "Próby pobrane przez" na certyfikacie analizy zadeklarowano: "pobrane przez Klienta", oznacza to, że wyniki analiz odnoszą się wyłącznie do próbek dostarczonych i przyjętych przez laboratorium.

Próbki PR21B9202/001-004, metoda A-VOCGMS05, A-VOCGMS06 - LOR został(-y) podniesione z powodu interferencji matrycy

Próbki PR21B9202/001-004, metoda A-VOCGMS06 - raportowany wynik został obliczony na podstawie informacji o czasach poboru dostarczonych przez Klienta. Laboratorium nie ponosi odpowiedzialności za prawidłowość tych informacji.

Dla pewnych analitów wartość próbkowania została ustalona na podstawie wartości współczynnika dyfuzji. W celu uzyskania dodatkowych informacji, prosimy o kontakt z Biurem Obsługi Klienta.

### Odpowiedzialny za prawidłowość

Testing Laboratory nr 1163  
Accredited by CAI according to  
CSN EN ISO/IEC 17025:2018

#### Podpisy

Zdeněk Jiráček

#### Pozycja

Environmental Business Unit  
Manager

Firma jest certyfikowana zgodnie z normą ČSN EN ISO 14001 (Systemy zarządzania środowiskowego) i ČSN ISO 45001 (Systemy zarządzania bezpieczeństwem i higieną pracy)

przygotowania próbki jest wyświetlony jako 0:00 - to informacja ta nie została przekazana przez klienta. Niepewność pomiarowa jest wyrażona jako rozszerzona niepewność pomiarowa powiększona o współczynnik  $k = 2$ , reprezentującego 95% poziomu ufności.

Klucz: LOR = Limit raportowania; NP = Niepewność pomiarowa. .

## Koniec wyników analiz

### Podsumowanie zastosowanych metod

| Metody analityczne  | Opis metody  |
|---|--|
| <i>Miejsce wykonania analizy: Na Harfe 336/9 Praha 9 - Vysočany Republika Czeska 190 00</i> |  |
| A-VOCGMS05  | CZ_SOP_D06_03_153 (NIOSH) Oznaczanie lotnych związków organicznych metodą chromatografii gazowej z detekcją FID i MS i obliczanie sumy lotnych związków organicznych ze zmierzonych wartości i przeliczenie na objętość powietrza.       |
| A-VOCGMS06  | CZ_SOP_D06_03_153 (NIOSH) Oznaczanie lotnych związków organicznych metodą chromatografii gazowej z detekcją FID i MS oraz obliczenie sumy lotnych związków organicznych ze zmierzonych wartości oraz przeliczenie na objętość powietrza. |

Symbol `` poprzedzający metodę oznacza brak akredytacji w przypadku naszego laboratorium i podwykonawców. W wypadku gdy procedura należąca do metody akredytowanej została użyta do nieakredytowanej matrycy. Oznacza to, że uzyskane wyniki nie posiadają akredytacji. Proszę zapoznać się z ogólnymi uwagami na pierwszej stronie. Jeśli na raporcie znajdują się wyniki analiz podzlecanych, to te analizy zostały wykonane poza laboratoriami ALS Czech Republic, s.r.o.

Zasady obliczeń i sumowania parametrów dostępne są na życzenie w Dziale Obsługi Klienta
